[25] **CAGE, John**

Le livre des champignons. Traduit par Pierre Lartigue. Marseille: Ryôan-ji 1983
p (1)-93, (94-96)

The composer and experimental artist John Cage was an enthusiastic amateur mycologist and mycophagist. With four other friends, he founded the New York Mycological Society. In 1964 Cage received the North American Mycological Association's Award for Contributions to Amateur Mycology, which is „given annually to recognise a person who has contributed extraordinarily to the advancement of amateur mycology.“ The main parts of his mycological writings and poems were translated to French in 1983. The cover of the volume has been designed by Cage himself. The book came out in a limited edition of 2000 copies, printed on special quality paper. Old owner's blind-stamp on fly-leaf. Untersuchungen vom Meere, die auf Veranlassung einer Schrift, de columnis Herculis, welche der hochberühmte Professor in Altorf, Herr Christ. Gottl. Schwarz, herausgegeben, nebst andern zu derselben gehörigen Anmerkungen von einem Liebhaber der Naturlehre und der Philologie, vorgetragen werden. Frankfurt und Leipzig 1750
3 parts: (i-xvi), (1)-38; (i, i-iii), iv-lxxvi, 49-274; 275-432, (1-46): vignettes

A curious book and a fascinating, largely unknown early contribution to the knowledge of fungi in Central Europe. Popowitsch (1705-1774), was an eccentric Austrian linguistic researcher and natural scientist, born in the Steiermark. He discovered the world of fungi during his studies at the University of Graz, as a teacher and frequent traveller and during his time as a rather poor mushroom-picker in Kremsmünster. He wrote the „Untersuchungen vom Meere“, during a following two-year stay in Regensburg. The book was intended as a translation and commentary of „De Columnis Herculis“ by the philologist Christian Gottlieb Schwarz (1675-1751) from Altdorf. But Popowitsch expands the project and discusses eloquently numerous oceanographical, philological or linguistic subjects and natural history observations and theories. Sharply, he criticises Linnées description of plants and cryptogames and delivers his own detailed observations on fungi. In fact, the „Untersuchungen“ in part 3 („Nachlese von Zugaben“) on p. 351-398 is the first lengthy treatise on mushrooms in German language, giving a short systematic survey and discussing popular names of fungi. Nine years later, Popowitsch is quoted in Jacob Christian Schäffer's first mushroom book in German language, „Vorläufige Beobachtungen der Schwämme um Regensburg“ (1759). Popowitsch's own wish to publish a „Sammlung der Oberösterreichischen und Regensburgischen Schwämme“ with coloured plates by the artist Johann Daniel Meyer in Nürnberg was never realised. - The work is not mentioned in the books on the history of mycology by Lütjeharms, Ainsworth, Lazzari or Dörfelt. Of the botanical and mycological bibliographies, only Pritzel quotes it and remarks: „A p. 351-398 agitur de fungis, et merita Linnaei detrectantur“.

[271] STAUDE, Friedrich

Die Schwämme Mitteldeutschlands, insbesondere
des Herzogthums Coburg. Mit 52 colorirten
Abbildungen. Coburg: Druck der Dietz'schen
Hofbuchdruckerei 1857

p (i), (i)-xxviii, (1-75, in columns 1-150): 10 hand-
coloured lith. plates.

(On cover: Festgabe für die Mitglieder der XIX.
Versammlung deutscher Land- und Forstwirte zu
Coburg 1857)

Volbracht 2041; Stafleu 12.834; Uellner 1725. - A rare
and important taxonomical work, creating new genera like
Collybia or Crepidotus. Friedrich Staude was a physician
and botanist at Coburg. This is the first issue of his book,
distributed in 1857 as a present for the participants of a
congress of agriculturists and foresters. In 1858, the work
was reissued as a first instalment (Erste Lieferung) of a larger
work, which was not continued. Staude died in 1861. A very
nice copy with a stamp of Lehrbücherei Rostock on back of
title. Bound in original decorated hard cover, small old label
on cover; 32 cm Euro 1800

p (i-xxxviii), 1-396, (1-20, ind., err.): Etched title
by E. van Ordonie after A. van Westerhout, portrait
by Westerhout after C. E. Biset, 36 (27 folded)
plates

Volbracht 2050; Stafleu 13.012; Vicaire 804; Uellner 1735; Nissen 1892; Hunt 341; Burdet 228; Dörfelt/Heklau p. 65 ff. - Very rare first edition of the first important book in history almost completely devoted to fungi. Further, the *Theatrum fungorum* is the first book with copper-plate illustrations of larger fungi. Sterbeek (1630-1693) was a Flemish priest and botanist. The beautiful figures are partly taken from earlier illustrated herbals. The most are drawn after the famous Clusius Codex, which came in Sterbeek's possession in 1772.

Very good copy, only slightly browned. With the very nice frontispiece showing a fungi-market in Antwerpen and the portrait of the author. A second portrait of Joanne van Buytenis is inserted as a reproduction on old paper, from another copy. Old pig skin binding. 20,2 x 15,7 cm

Euro 5500

Volbracht 2136; Stafleu 15315; Uellner 1798; Nissen 2010, Krieger p 23; Ainsworth p 28. - Not the British reprint from 1935, but the very rare original Latin edition of this work, presenting some of the finest mycological plates ever published. Louis-René Tulasne (1815-1885) studied law. He worked as a public notary for a few years and then became a private scientist at Paris, dedicating himself to botany and the Christian religion. His brother Charles Tulasne (1815-1884) was a physician in Paris. The brothers are most famous for their fundamental study on truffles (Fungi hypogaei, 1851) and this extraordinary work with the finely drawn and engraved plates by Charles Tulasne. A good copy, with slight browning or spotting to text and plates (a bit stronger in vol 1). A small tear to title to vol 1 repaired, a few corners of plates or text-pages with knits. Bound in contemporary half-leather with gilt spines. 35 cm
